Maximize Your Return with the Clean Technology Investment Tax Credit (CT ITC)

Available for EFOY Fuel Cell Customers Across Canada.

Invest in Clean Power. Get up to 30% Back.

If you've installed or are planning to install EFOY Direct Methanol Fuel Cells (DMFC) and/or EFOY Hydrogen Fuel Cells, you may be eligible for the Clean Technology Investment Tax Credit (CT ITC) **a refundable tax credit of up to 30% on capital costs** associated with qualifying clean energy technology.

EFOY Fuel Cells Qualify Under:

- Eligible Clean Technology Property (Class 43.1 or 43.2)
- Equipment that generates electricity without fossil fuels
- Stationary systems used to power off-grid or remote operations

What You Can Claim:

- 30% tax credit on eligible equipment placed into service between March 28, 2023 – Dec 31, 2033
- 15% credit for systems commissioned in 2034
- Claim made on your corporate or trust income tax return

Note: As labour rules apply to work performed on or after November 28, 2023.

Claim Checklist:

- Property type and CCA class (e.g., EFOY DMFC or H2 system)
- Capital cost, location, and labour compliance declaration
- CT ITC summary and any partnership allocations (if applicable)

Key Filing Notes:

- File your claim by the due date of your T2 (Corporation) or T3 (Trust) return
- Consult your tax advisor or accounting professional for detailed eligibility and documentation requirements

Let EFOY Fuel Cells help power your operations — and your bottom line.
